Word Search - April Fools
Photons are particles of light. It can take a photon 40,000 years to travel from the core of the sun to the surface, but only 8 minutes to travel the rest of the way to earth.

Basically anything that melts can be made into glass. You just have to cool off a molten material before its molecules have time to realign into what they were before being melted.

A small percentage of the static you see on "dead" tv stations is left over radiation from the Big Bang. You’re seeing residual effects of the Universe's creation.

Written language was invented independently by the Egyptians, Sumerians, Chinese, and Mayans.

In 1980, the first one gigabyte (GB) hard drive cost $40,000 and weighed over 500 pounds. Today, a 1 GB drive costs under $3 and weighs less than an ounce.

The largest art heist in history occurred on March 18th, 1990 at the Isabella Stewart Gardner Museum in Boston. A total of 13 paintings worth $500M were stolen by two men posing as police officers. Paintings by masters including Degas, Vermeer, Rembrandt and Manet were among those taken. To this day the empty frames are still hanging, acting as placeholders until the pieces are returned.

The act of “giving the key to the city,” a symbolic honor, is a continuation of a Medieval practice wherein walled cities would be locked at night, but someone given the key could come and go as they please as an honored and trusted friend of city residents.

Optical Illusion #1
Is a real square created here?

Optical Illusion #2
Do you see a vase? Or do you see two faces?
